## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 - 15, 21, 22, and 25 - 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With regard to claim 1, the phrase "a optically" should read "an optically". With regard to claim 7, although the claim is drawn to a system for "improving the appearance of skin" none of the claimed elements limit the device to this scope. With regard to claims 21 and 22, it is unclear what Applicant intends to define by use of the phrase "can produce" as opposed to a phrase such as "produces". With regard to claims 25 - 28, it is unclear what further limitations to the claimed elements Applicant intends to set forth.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 16 - 18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims improperly include the human body (skin) as part of the claimed subject matter.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 3736

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

6. Claims 1, 2, 5 - 13, 16 - 19, 21 - 24, 27, and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Ghaffari. Ghaffari teaches an apparatus and method for the application of light to the skin for treatment of Port Wine Stain that includes an arc lamp for irradiation of the skin, mirrors and lenses for directing the light within the system, and a sapphire lens or window (156) for transmitting the light to the skin. The sapphire lens or window is optically transparent to the wavelengths of interest. In addition, Figures 8a - 8d illustrate embodiments where a second optically transparent medium, a cooling gas, also is included in the optical system. It is inherent that the system of Figure 9, for example, includes a power supply for the arc lamp.

7. Claims 1 and 23 - 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Rohr. Rohr teaches a method and apparatus for photoepilation that includes a pulsed light source 38, and a contact device that includes a first optically transparent medium, cable 20, and a second optically transparent medium, probe 18 with probe tip 40 for transmitting light to the skin for performing hair depilation.

### ***Double Patenting***

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the

Art Unit: 3736

unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1 - 28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 5,620,478. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one of ordinary skill in the art at the time of the invention to perform the method of the patent with the claimed apparatus.

10. Claims 1 - 28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 3 and 6 of U.S. Patent No. 5,683,380. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are directed to an apparatus and method for treatment of skin with light. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide a power supply for the light source of the claims of the patent, since one of ordinary skill in the art would recognize that the light source requires a power supply to operate properly.

Art Unit: 3736

11. Claims 1, 7, 13, 14, 16, and 19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3, and 4 of U.S. Patent No. 6,280,438. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the instant application are merely broader renditions of the claims of the patent. Therefore any device meeting the limitations of the claims of the patent would necessarily meet the limitations of the claims of the application.

12. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

13. Claims 3, 4, and 15 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 - 3 of prior U.S. Patent No. 6,280,438. This is a double patenting rejection.

**6/18/01**

**The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.**

**INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

**1. Correction of Informalities -- 37 CFR 1.85**

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

**2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.**

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

**Timing of Corrections**

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
